

The IMD MBA develops top talent with:

- a proven ability to perform
- the experience to deal with ambiguity, complexity and cultural diversity
- the skills to set strategies

In addition to the business basics – taught in any MBA program – responsible leaders need to consider the context in which they make decisions, to anticipate both short-term and long-term consequences, and to build and sustain relationships.

IMD MBAs learn these skills through real-life experiences such as the Entrepreneurship Projects, the International Consulting Projects and the Discovery Expedition. IMD's combination of relevance and rigor is part of the reason why companies come to recruit at IMD and why the IMD MBA program consistently ranks among the best in the world.
