A PRACTICAL PERSPECTIVE:
How Managers Become Leaders: the Seven Seismic Shifts®

BY PROF MICHAEL D. WATKINS

The IMD Global Board Center

Mission: helping your board be its best

IMD has provided board education for the last 35+ years, helping the boards of leading organizations to boost their performance. The IMD Global Board Center takes this a step further, carrying out world-class governance research and providing an even wider range of education opportunities to support long-term business success through a strong board.
SEVEN TRANSITIONS GOOD LEADERS MUST MAKE

MOVING FROM A FUNCTIONAL LEADER TO A GENERAL MANAGER

There’s no doubting the significant transitions that leaders go through in taking new roles. And the most challenging transitions occur in moving from being a functional leader to being a general manager, or business unit leader, or enterprise leader for the first time. But what hasn’t been clear is the nature of those shifts.

By interviewing more than forty senior executives to gain first-hand qualitative research we looked at the nature of transitions in leadership. From this rally came the notion of seven major shifts that leaders go through as they move from functional leadership to enterprise leadership.

1. **From specialist to generalist.** A company’s business functions are managerial subcultures with their own rules and languages. Managers transitioning to enterprise leadership roles must therefore work hard to achieve “cross-functional fluency.” Someone who grew up in marketing obviously cannot become a native speaker of operations or R&D, but he or she can become fluent—comfortable with the central terms, tools, and ideas employed by the various functions whose work he or she must integrate. Critically, enterprise leaders must know enough to be able to evaluate and recruit the right people to lead functional areas in which they are not experts.

2. **From analyst to integrator.** The primary responsibility of functional leaders is to develop and manage their people to achieve analytical depth in focused domains. By contrast, enterprise leaders manage cross-functional teams with the goal of integrating the collective knowledge and using it to solve important organizational problems. As you might imagine, then, it’s important for new enterprise leaders to make the shift to managing integrative decision-making and problem-solving and, even more important, to learn how to make appropriate trade-offs. Enterprise leaders must also manage in the “white spaces”—accepting responsibility for issues that don’t fall neatly into any one function but are still important to the business.

3. **From tactician to strategist.** More so than functional leaders, enterprise leaders establish and communicate strategic direction for their organizations. So they must be able to define and clearly communicate the mission and goals (what), the core capabilities (who), the strategy (how), and the vision (why) for their businesses. Additionally, they must be able to switch gears with ease, seamlessly shifting between tactical focus (the trees) and strategic focus (the forest). Critically, they must learn to think strategically, which means honing their ability to (1) perceive important patterns in complex environments, (2) crystallize and communicate those patterns to others in the organization in powerful ways, and (3) use these insights to anticipate and shape the reactions of other key “players,” including customers and competitors.

4. **From bricklayer to architect.** As managers move up in the hierarchy, they become increasingly responsible for laying the foundation for superior performance—creating the organizational context in which business breakthroughs can happen. To be effective in this regard, enterprise leaders must understand how strategy, structure, systems, processes, and skill bases interact. They must also be expert in the principles of organizational design, business process improvement, and human capital management. Few high-potential leaders get any formal training in organizational development theory and practice, leaving them ill-equipped to be the architects of their organizations or to be educated consumers of the work of organizational development consultants.

5. **From problem-solver to agenda-setter.** Many leaders are promoted on the strength of their problem-solving skills. But when they reach the enterprise leader level, they must focus less on fixing problems and more on setting the agenda for what the organization should focus on doing. Being an agenda-setter means identifying and prioritizing emerging
threats, and communicating them in ways that the organization can respond to. The rest of the task calls for mobilizing preventive action and driving organizational change. And it ultimately means creating a learning organization that responds effectively to shifts in its environment and can generate surprises for its competitors.

6. From warrior to diplomat. Effective enterprise leaders see the benefits in actively shaping the external environment and managing critical relationships with powerful outside constituencies, including governments, NGOs, the media, and investors. They identify opportunities for cross-company collaboration, reaching out to rivals to help shape the rules of the game. Functional managers, by contrast, tend to be more focused on developing and deploying internal capabilities to contend more effectively with key competitors.

7. From warrior to diplomat. Effective enterprise leaders see the benefits in actively shaping the external environment and managing critical relationships with powerful outside constituencies, including governments, NGOs, the media, and investors. They identify opportunities for cross-company collaboration, reaching out to rivals to help shape the rules of the game. Functional managers, by contrast, tend to be more focused on developing and deploying internal capabilities to contend more effectively with key competitors.

These seven shifts in changing from functional leadership to enterprise leadership are crucial to the success of the transition. But, important to keep in mind that the biggest reasons why leaders fail in such transitions are because they don’t go back into a learning mode. Nothing fully prepares someone for becoming an enterprise leader for the first time but there is a lot that can be done in preparation and by knowing what the shifts entail, leaders will be better prepared to undergo transition.
About the author

Professor Michael D. Watkins

Michael Watkins is an adjunct professor at IMD. He has spent the last two decades working with leaders – both corporate and public -- as they transition to new roles, transform their organizations, and craft their legacies as leaders.

Dr. Watkins is author of the international bestseller The First 90 Days: Critical Success Strategies for New Leaders at all Levels, which The Economist recognized as “the on-boarding bible.” With more than 500,000 copies sold in English, and translations in 27 languages, The First 90 Days has become the classic reference for leaders in transition. Recently it was named one of the best 100 business books of all time.

Prior to joining IMD, Dr. Watkins was a professor at INSEAD, the Harvard Business School, and the Kennedy School of Government at Harvard, where he designed and taught world-class programs for future enterprise leader development, strategic negotiation, and corporate diplomacy.

Dr. Watkins is the author or co-author of eleven books and numerous articles on leadership and negotiation. In the field of leadership these include Your Next Move: The Leader’s Guide to Managing Critical Career Transitions (HBS Press 2009), Shaping the Game: The New Leader’s Guide to Effective Negotiating (HBS Press 2006) and Predictable Surprises: The Disasters You Should Have Seen Coming and How to Avoid Them (HBS Press 2004). Predictable Surprises was named one of the best business books of 2004 by Strategy + Business and won the 2006 annual Kulp-Wright Award from The American Risk and Insurance Association. In addition, Dr. Watkins has written extensively on business-government relations, international security and negotiation, most recently co-authoring Case Studies in U.S. Trade Negotiation, Volumes 1 and 2 and Winning the Influence Game: What Every Business Leaders Should Know About Government. His books on negotiation - Breakthrough International Negotiation: How Great Negotiators Transformed the World’s Toughest Post-Cold War Conflicts and Breakthrough Business Negotiation: A Toolbox for Managers, won the CPR Institute’s prize for best books in the field of negotiation in 2001 and 2003. Dr. Watkins is the co-founder of Genesis Advisers, a transition acceleration consultancy. He has designed coaching processes, programs and virtual workshops to help organizations accelerate everyone taking new roles, as well as speed up organizational transformations.
